Divakar Singh Purva

Noida, Uttar Pradesh +91 6367326624 divakarpurva04@gmail.com https://github.com/divakardsp
https://www.linkedin.com/in/divakarsinghpurva/

Full-Stack Software Engineer specializing in scalable backend architectures, microservices, and event-driven systems. Experienced in optimizing server-side latency and migrating production environments, paired with the ability to build seamless user interfaces using Next.js. Actively integrating Large Language Models (LLMs) and async workflows to develop context-aware web applications.

Technical Skills

Languages: TypeScript, JavaScript, Java

AI & Workflows: Agentic AI, LLM Integration, Vercel AI SDK, Inngest, Prompt Engineering

Backend Development: Node.js, NestJS, Express.js, REST APIs, tRPC, Socket.IO, Apache Kafka, Redis

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Databases & Storage: PostgreSQL, MongoDB

DevOps & Tools: Docker, Git, Linux, AWS (EC2)

Experience

Easecommerce **06/2025 – 08/2025**
Backend Developer Intern *Bengaluru, Karnataka*

- Spearheaded the migration of 50+ production REST APIs from a monolithic Express.js architecture to a modular NestJS microservices ecosystem.
- Optimized API routing and database interactions, reducing average response latency by ∼20% and improving overall code maintainability.
- Collaborated with senior engineers to execute a zero-downtime deployment strategy, maintaining 99.9% uptime for active users during the transition.

Projects

CodeDog: AI Agent for Automated GitHub PR Reviews [https://code-dog-nvoq.vercel.app]

- Architected an AI-powered GitHub code review platform using Next.js 16 and TypeScript, automating PR feedback via OpenRouter AI.
- Decreased average pull request review time by 50% by delivering immediate, automated code analysis to developers.
- Engineered GitHub webhook processing for repository syncs via Inngest background jobs, while integrating Razorpay subscriptions and PostgreSQL data persistence using Prisma ORM.

Fortify: OAuth2 & OIDC Authentication Server [https://fortify-3.onrender.com]

- Developed a production-ready OpenID Connect (OIDC) and OAuth2 authorization server in Express.js.
- Implemented asymmetric RSA-signed JWT authentication and a custom JWKS endpoint for third-party token verification.
- Engineered secure user workflows (email verification, password resets) utilizing Drizzle ORM and PostgreSQL.

TraceKaf: Real-Time Location Tracking System [https://tracekaf.onrender.com]

- Built a real-time location tracking engine (Node.js), broadcasting live GPS coordinates to a map at 5-second intervals via Socket.IO.
- Integrated Apache Kafka as a message broker to decouple location ingestion, ensuring low-latency concurrent updates.
- Secured socket connections using custom OAuth2 middleware, authenticating clients via JWTs from the Fortify server.

Education

Bennett University **2023 – 2027**
Bachelor of Technology (B.Tech) *Greater Noida, India*

- **CGPA:** 8.26
- Awarded **a 35% Merit-Based Scholarship** for four consecutive academic years.
- **Relevant Coursework:** Computer Networks, Data Structures, Operating Systems, Database Management Systems
